

Army Engineers Meet Colorado River Goats

NEEDLES — Col. Earl G. Dingle, chief engineer of the U.S. Army Engineer District, presided at a meeting of the Colorado River Goats, a group of anglers who have organized to improve the river. Dingle, who is in charge of the project, said that many of the fish charts of certain reaches of the river show a decline in the number of fish. He said that the project is to improve the river by clearing the bottom and other obstructions. He said that the project is to be completed by the end of the year. He said that the project is to be completed by the end of the year.

Another in the group was Col. Peacock who said he was not a member of the organization. He said that he was not a member of the organization. He said that he was not a member of the organization. He said that he was not a member of the organization. He said that he was not a member of the organization.

He said that he was not a member of the organization. He said that he was not a member of the organization. He said that he was not a member of the organization. He said that he was not a member of the organization. He said that he was not a member of the organization.
