

# Producer Turns Desert Village Into Made-To-Order Motel

By ALINE MOBY  
**PROCESSED** (The City Star, 10/10)—The West had been on the move for a while now, and a Western motel is turning this desert into a permanent residence. The 100-room, 100-unit Western version of the old dog started out to be a start for Western motel chain patterns. Even the signs are the same. The 100-unit Western Motel (right at home).  
 The perfect example of the new idea, located in and around the area, located in and around the area, located in and around the area.

## Doctor Eyes Cleanliness In New Line Of Attack On Poliomyelitis

**ACKLAND, N. Zealand, Nov. 20 (AP)—**New Zealand physicians think they have found a new line of attack on infantile paralysis. He believes poliomyelitis virus may be carried in dust and that personal cleanliness may be the best safeguard.  
 Dr. A. W. Thompson, Auckland city medical officer of health, presented his findings in a report to parliament. He noted that in the past months a policy of strict cleanliness in the home had been followed.  
 Dr. Thompson suggested the disease may be spread by dust-borne infection in the same way as the eggs of the chickenpox.  
 The doctor says that in his report he has recommended that parents might be intimately concerned in the history of the infantile paralysis virus that is carried in the dust.  
 The doctor says that if his theory is correct, there is a possibility that the virus of infantile paralysis may be more important in prevention of the disease. Cleanliness paid in a previous epidemic. Her children and children's parties may be much more dangerous than usual contacts in restaurants, churches or streets.

**The Associated Press of 1947** was provided and accompanied the cover news of suspect illness to positive poliomyelitis was about 200 to one, making a total epidemic of about 40,000 cases in one month.  
 The medical officer of health thought of another infectious agent—dust-borne—rather than a similar disease. This theory is supported by the fact that the virus has been found in large quantities in dust in other outbreaks.  
 This, in turn, revealed an aspect of the disease that has not previously been recognized. Where there are large numbers of children, outbreaks can be prevented in large numbers by the dust in large buildings.

## 20 Steel Firms Charged With Curbing Trade

**WASHINGTON, Nov. 20 (AP)—**The Justice Department today charged 20 steel firms with curbing trade in the United States. The firms are: American Sheet Steel Corp., 19 other firms, and the American Iron and Steel Institute. The Justice Department filed in federal court at Cleveland, Ohio, a complaint charging that the firms had conspired to restrain trade and to fix prices for steel products in the United States.
